EDMC

Dear Mr. Jim:

TRANSMITTAL OF THE REMEDIAL DESIGN/REMEDIAL ACTION WORK PLAN FOR
SELECT 200 NORTH AREA WASTE SITES (216-N-2, -3, -5, AND -7) IN THE 200-CW-3
OPERABLE UNIT, DOE/RL-2006-69, DRAFT B

The purpose of this letter is to transmit the Remedial Design/Remedial Action Work Plan for Select 200 North Area Waste Sites (216-N-2, -3, -5, and -7) in the 200-CW-3 Operable Unit, DOE/RL-2006-69, Draft B, for your review and information. This document has been prepared in support of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and the Interim Action Record of Decision Department of Energy Hanford 100 Area and 200 Area, EPA/ROD/R10-99/039, (Remaining Sites ROD).

The remedial design/remedial action work plan (RD/RAWP) is used to describe the design and the implementation of the remedial action processes required by the Remaining Sites Record of Decision. The remedial-design element of this document discusses the requirements for backfilling or contouring or some combination of backfilling and contouring each waste site after excavation and removal of the contaminated soils, and re-vegetation of the disturbed areas.

The remedial action element of the RD/RAWP addresses the field implementation process including: the initial remedy confirmation sampling and analysis; the determination of the correct remedy [e.g., No Action or Removal, Treatment, and Disposal (RTD)]; the execution of the RTD remedy (if chosen); waste sampling, analysis, treatment (as needed), packaging and disposal; waste site closeout sampling and analysis; data quality assessment evaluation to cleanup standards; and backfilling/contouring and re-vegetation of each remediated waste site.

The review is scheduled for completion by February 28, 2007, and we would like to receive your comments, if any, on or before that date.

Mr. Russell Jim
